**INTRODUCTION**

The applicant filed the Master Application on June 16, 2006. (Exhibit 1)

The Hearing Examiner (Examiner) made a site familiarization visit on January 15, 2007.

The Department of Planning and Development Services (PDS) gave proper public notice of the open record hearing as required by the county code. (Exhibits 20-23)

A SEPA determination was made on December 13, 2006. (Exhibit 19) No appeal was filed.

The Examiner held an open record hearing on January 18, 2007, the 65<sup>th</sup> day of the 120-day decision making period. Witnesses were sworn, testimony was presented, and exhibits were entered at the hearing.

**PUBLIC HEARING**

The public hearing commenced on January 18, 2007 at 3:05 p.m.

1. The Examiner indicated that he has read the PDS staff report, reviewed the file and viewed the area and therefore has a general idea of the particular request involved.

The hearing concluded at 3:31 p.m.

**NOTE:** Audio tapes of this hearing are available in the Office of the Hearing Examiner.

**FINDINGS, CONCLUSIONS AND DECISION**

**FINDINGS:**

1. The master list of Exhibits and Witnesses which is a part of this file and which exhibits were considered by the Examiner, is hereby made a part of this file, as if set forth in full herein.
2. The PDS staff report has correctly analyzed the nature of the application, the issues of concern, the application's consistency with adopted codes and policies and land use regulations, and the State Environmental Protection Act (SEPA) evaluation with its recommendation and conditions. This report is hereby adopted by the Examiner as if set forth in full herein.

3. Scott Darling of Darling Investments (Applicant) proposes to subdivide a 20.10 acre tract at approximately 4901 79<sup>th</sup> Avenue NE, Marysville, into 71 single-family lots, utilizing the lot size averaging provisions of the Snohomish County Code (SCC). The site is undeveloped and relatively flat. A series of wetlands occupy the center of the property.
4. The site was annexed to the City of Marysville while the application was pending. It was agreed that the County would continue review of the application for preliminary plat approval, using Marysville development standards.
5. The site is close to a future park planned by the City of Marysville. One letter was received from a nearby resident concerning the proximity of the plat to the park site. By working with Marysville staff, Applicant has satisfied that city's concerns regarding the proposed park.
6. Seven open space tracts are provided for native growth, wetlands, and stormwater detention. Easements for Olympic Pipeline and Puget Sound Energy form the western boundary of the site.
7. The site is designated for Urban Low Density Residential use and is zoned R-7200. It is in an Urban Growth Area.
8. Access to the site will be by three existing roads: two to the north property line and one to 79<sup>th</sup> Avenue NE to the south. Two road connections are planned to the east when that property is developed. The access via 79<sup>th</sup> Avenue NE to the south will be barricaded. If and when Applicant is able to use that street for access, he will need a variance from the City of Marysville to allow direct access from lots to this arterial.
9. The subdivision will generate an average of 718 vehicle trips per day, with 76 in the a.m. peak hour and 56 in the p.m. peak hour. The project was deemed concurrent on August 4, 2006.
10. Applicant will pay impact fees for roads, state highways and Arlington and Marysville streets. In addition, Applicant will discharge his transportation demand management responsibility by payment of \$5,378.25.
11. Sidewalks will be provided along the property frontage from 79<sup>th</sup> Avenue NE and on both sides of new roads. Children will have safe walking conditions to school bus stops.
12. Stormwater will be routed to a detention pond at the southwest end of the property. The proposed system has been conceptually approved and will be subject to full drainage review and approval prior to construction of improvements.
13. Any Finding of Fact in this Report and Decision, which should be deemed a Conclusion, is hereby adopted as such.

### CONCLUSIONS:

1. The Examiner having fully reviewed the PDS staff report, hereby adopts said staff report as properly setting forth the issues, the land use requests, consistency with the existing regulations, policies, principles, conditions and their effect upon the request. It is therefore hereby adopted by the Examiner as a conclusion as if set forth in full herein, in order to avoid needless repetition. There are no changes to the recommendations of the staff report.

2. The design criteria for approval of a subdivision are set forth in RCW 58.17.100-120 and .195 and require that the proposed plat conform to applicable zoning ordinances and comprehensive plan, and make appropriate provisions for the public health, safety and general welfare for open spaces, drainage ways, streets or roads, alleys, other public ways, transit stops, potable water supplies, sanitary wastes, parks and recreation, playgrounds, schools and school grounds, and other planning features including safe walking conditions for students.
3. Staff concludes that the proposed plat satisfies these criteria and the Examiner concurs. The plat should be approved, subject to the following Conditions to assure compliance with the statutory criteria:

### CONDITIONS

- A. The revised preliminary plat received by PDS on October 24, 2006 (Exhibit 14) shall be the approved plat configuration. Changes to the approved plat are governed by SCC 30.41A.330.
- B. Prior to initiation of any site work; and/or prior to issuance of any development/construction permits by the county:
  - i. All site development work shall comply with the requirements of the plans and permits approved pursuant to Condition A, above.
  - ii. The platlor shall mark with temporary markers in the field the boundary of all Native Growth Protection Areas (NGPA) required by Chapter 30.62 SCC, or the limits of the proposed site disturbance outside of the NGPA, using methods and materials acceptable to the county.
  - iii. A final mitigation plan based on the Critical Area Study and Conceptual Mitigation Plan for Harvest Hills, prepared by Curran Environmental Services revised October 18, 2006 shall be submitted for review and approval during the construction review phase of this project.
- C. The following additional restrictions and/or items shall be indicated on the face of the final plat:
  - i. "The dwelling units within this development are subject to park impact fees in the amount of \$48.82 per newly approved dwelling unit pursuant to Chapter 30.66A. Payment of these mitigation fees is required prior to building permit issuance; provided that the building permit has been issued within five years after the application is deemed complete. After five years, park impact fees shall be based upon the rate in effect at the time of building permit issuance."
  - ii. "The lots within this subdivision will be subject to school impact mitigation fees for the Lake Stevens School District to be determined by the certified amount within the Base Fee Schedule in effect at the time of building permit application, and to be collected prior to building permit issuance, in accordance with the provisions of SCC 30.66C.010. Credit shall be given for five existing parcels. Lots 1 through 5 shall receive credit."
  - iii. "Chapter 30.66B SCC requires the new lot mitigation payments in the amounts shown below for each single-family residential building permit:  
\$2,315.94 per lot for mitigation of impacts on county roads paid to the county,  
\$75.75 per lot for transportation demand management paid to the county for TSA A,  
\$2,540.00 per lot for mitigation of impacts on Marysville streets paid to the city,

\$209.68 per lot for mitigation of impacts on Arlington streets paid to the city.

These payments are due at the time of building permit issuance for each single-family residence. Notice of these mitigation payments shall be contained in any deeds involving this subdivision of the lots therein. Once building permits have been issued all mitigation payments shall be deemed paid."

- iv. On lots with more than one road frontage, County Engineering Design and Development Standards (EDDS) restricts lot access to the minor road, unless the Department of Public Works grants a formal deviation.
- v. All Critical Areas shall be designated Native Growth Protection Areas (NGPA) (unless other agreements have been made) with the following language on the face of the plat;

"All NATIVE GROWTH PROTECTION AREAS shall be left permanently undisturbed in a substantially natural state. No clearing, grading, filling, building construction or placement, or road construction of any kind shall occur, except removal of hazardous trees. The activities as set forth in SCC 30.91N.010 are allowed when approved by the County."

D. Prior to recording of the final plat:

- i. Urban standard frontage improvements shall be constructed along the property frontage with 79th Avenue NE in conformance to the City of Marysville design standards and the deviation request approval, unless bonding of improvements is allowed by PDS, in which case construction is required prior to any occupancy of the development.
- ii. Bollards or a barrier that meet EDDS requirements and/or the Fire Marshal's requirements shall block access to the south on 79th Avenue NE until such time that it has been constructed to minimum county design standards from the subject property to 44th Avenue NE. A temporary turnaround shall have been constructed north of the bollards/barrier as a turnaround for the south section of 79th Avenue NE.
- iii. Native Growth Protection Area boundaries (NGPA) shall have been permanently marked on the site prior to final inspection by the county, with both NGPA signs and adjacent markers which can be magnetically located (e.g.: rebar, pipe, 20 penny nails, etc.). The platlor may use other permanent methods and materials provided they are first approved by the county. Where an NGPA boundary crosses another boundary (e.g.: lot, tract, plat, road, etc.), a rebar marker with surveyors' cap and license number must be placed at the line crossing.

NGPA signs shall have been placed no greater than 100 feet apart around the perimeter of the NGPA. Minimum placement shall include one Type 1 sign per wetland, and at least one Type 1 sign shall be placed in any lot that borders the NGPA, unless otherwise approved by the county biologist. The design and proposed locations for the NGPA signs shall be submitted to the Land Use Division for review and approval prior to installation.

- iv. The final mitigation plan shall be completely implemented.

E. In conformity with applicable standards and timing requirements:

- i. The preliminary landscape plan (Exhibit 4) shall be implemented. All required detention facility landscaping shall be installed in accordance with the approved landscape plan.

F. All development activity shall conform to the requirements of Chapter 30.63A SCC.

Nothing in this recommended approval excuses the applicant, owner, lessee, agent, successor or assigns from compliance with any other federal, state or local statutes, ordinances or regulations applicable to this project.

Preliminary plats which are approved by the county are valid for five (5) years from the date of approval and must be recorded within that time period unless an extension has been properly requested and granted pursuant to SCC 30.41A.300.

4. Any Conclusion in this Report and Decision, which should be deemed a Finding of Fact, is hereby adopted as such.

#### DECISION:
