**Re: City of Marysville Substantial Development Permit No. PA22001
Ecology Permit No. 2024-NWRO-7972**

Dear Steven Miller:

On March 22, 2024, the Department of Ecology (Ecology) received notice that the City of Marysville (City) has approved with conditions your application for a Substantial Development Permit (SDP) for Geddes Marina – Phase 2 Remediation, which includes capping the former boat basin and outlet channel to an elevation above the ordinary high water mark. The project also includes rerouting the City's downtown stormwater conveyance system via a conveyance pipeline and energy dissipation structure to the revised channel location along the western edge of the Geddes Marina site. The conveyance channel will discharge to Ebey Slough near the southwest corner of the site. The project is located at 1304 and 1326 First Street within Aquatic, Aquatic Urban, and High Intensity shoreline environment designations along Ebey Slough.

By law, local governments must review all SDPs for compliance with:

- The Shoreline Management Act (Chapter 90.58 RCW),
- The SDP approval criteria (WAC 173-27-150), and
- The Marysville Shoreline Master Program.

Local governments, after reviewing SDPs for compliance, are required to submit them to Ecology. We have received your SDP.

Please note, other federal, state, and local permits may be required in addition to this shoreline permit.
