PROJECT INFORMATION			
Project Title	Marina Basin Remediation	File No.	PA 16-034
Detailed Project Description	<p>The applicant has submitted an application for environmental review to allow the placement of a minimum 6-inch cap within the marina basin to isolate the bulk contaminants from the benthic macroinvertebrates that inhabit surface sediments. The cap would be composed of clean sandy material and would cover the entire lagoon bottom to isolate contaminants and promote recovery. The environmental remedial action will mitigate the potential for future impact to human health and the environment by addressing site contaminants that exceed associated "Model Toxic Control Act" (MTCA) cleanup levels for unrestricted land use. No material will be removed from the basin.</p> <p>The "Focused Site Assessment Report and Implementation Strategy" which was developed through a "Brownfield Clean-up Cooperative Agreement Work Plan" will be followed during project construction.</p>
