Re: Undi Commerce Park
File# PA22-008, Ecology SEPA# 202402935

Dear Chris Holland:

Thank you for the opportunity to provide comments on the State Environmental Policy Act (SEPA) mitigated determination of nonsignificance (MDNS) for the Undi Commerce Park project. Based on review of the checklist associated with this project, the Department of Ecology (Ecology) has the following comments:

Under RCW 90.03.350, a Dam Safety construction permit is required for those dams or ponds that can impound a volume of 10 acre-feet or more of water or other liquids above ground level. This also includes ponds that share a common berm which in combination the volume is 10 acre-feet or more. The Undi Commerce Park project references stormwater facilities as part of the project, if this includes impoundments that meet or exceeds the above referenced criteria, you will need to apply for a dam construction permit. To determine if a Dam Safety construction permit is required for your project, the applicant must submit a set of construction plans to:

WA Department of Ecology
Dam Safety Office
P.O. Box 47600
Olympia, WA 98504-7600

The construction permit application can be found by entering the following link into your search engine: <https://apps.ecology.wa.gov/publications/summarypages/ecy07038.html>.
