Amy,

The Traffic Concurrency Recommendations are acceptable.

William and Gibriel,

Please see the [Traffic Concurrency Recommendation](#) for the Heart Saved ESF. Once you've reviewed, if you find it acceptable, I need a written response from you stating that you accept the recommendation. It can be a simple response to this email, stating that you accept the terms and conditions of the recommendation, or you can send a more formal memo, it's completely up to you.

Once I get your acceptance, I can go ahead and issue the SEPA determination, and then the site plan approval once the appeal period for the SEPA determination is up (14 days). Please let me know if you have any questions.

Thanks,
