Subject: RE: crime history - Caliber Collision * Marysville WA 20508

(External Sender)

Hello,

So over the past 12 months we have experienced multiple thefts of catalytic converters, vehicles broken into and customer possessions taken, batteries, and fuel tanks drilled into we have probably been targeted well over 30+ times recently they have been cutting into our fence 5 out of 7 nights a week which we continue to repair at this point I believe our losses are as follows.

-Catalytic converters 35K

-Customer items stolen 10K

-Fuel tanks and lost fuel 5K

-Batteries 1K

We have called the police multiple times and have made reports but most recently the officers have not come out and have just called back we have asked if they can patrol and drive through at night and have been told that due to a lack of officers they can not guarantee anything because they only have 1 officer on the night shift for this area. We have changed the gate locks and chains to the most heavy duty we can find and they just keep snipping the chain link fence to access the storage lot. We have tried installing trail cameras in hidden spots to capture these acts in progress and they have also stolen those after they had located them. The storage lot is at the back of our building approx 100yds and is on the backside of the building which is not able to be seen from the street view.
