

# SEPA ENVIRONMENTAL CHECKLIST

## APPLICATION REVIEW

### Purpose of checklist

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization, or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

### Instructions for applicants

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. **You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown.** You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to **all parts of your proposal**, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

### Instructions for lead agencies

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

### Use of checklist for nonproject proposals

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B, plus the [Supplemental Sheet for Nonproject Actions \(Part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in "Part B: Environmental Elements" that do not contribute meaningfully to the analysis of the proposal.

### Application Format

The application will only be accepted if the original form is used (with typewritten answers in the spaces provided) or the application is reproduced in identical form.

**NOTE: The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. You may be asked to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.**

**Required Attachments**

1. Vicinity map clearly showing the location of the project with respect to public streets and other parcels and development
2. Site plan\*
3. Conceptual building elevations
4. Preliminary civil plans
5. Wetland Delineation, if applicable
6. Geotechnical Reports, if applicable
7. Critical Areas Report (fish and wildlife habitat), if applicable

*\*The site plan must show north arrow and engineering scale; any significant or natural features such as creeks, wetlands, steep slopes; dimensions and shape of the lot; location and size of existing and proposed buildings and development, including parking and landscape areas, adjacent streets and point of ingress and egress, and adjacent uses.*

**Correspondence**

Note that all correspondence regarding the environmental review of your project will be sent to the person listed as **Applicant**.

**Fees**

There is a nonrefundable application fee for all environmental checklists. Submit the fee with the application(s) and make checks payable to the City of Marysville.

Residential (1-9 lots or dwelling units) .....	\$350.00
Residential (10-20 lots or dwelling units) .....	\$500.00
Residential (21-100 lots or dwelling units) .....	\$1,000.00
Residential (greater than 100 lots or dwelling units) .....	\$1,500.00
Commercial/Industrial (0 to 2 acres) .....	\$350.00
Commercial/Industrial (2.1 to 20 acres) .....	\$750.00
Commercial/Industrial (greater than 20 acres) .....	\$1,500.00

**Pre-Application Conference**

Most projects that are not categorically exempt from SEPA will require a pre-application conference; in some cases, at the discretion of the Community Development Director, the pre-application conference may be waived. The pre-application conference must be conducted prior to the submittal of the environmental checklist.

**SEPA Exempt Determinations**

Projects that meet the thresholds for categorical exemptions of Chapter 22E.030 MMC are exempt from filing an environmental checklist. All other project and non-project actions require a completed environmental checklist and a project permit application to be submitted. If an applicant feels that their proposal should be considered to be SEPA-exempt, the applicant can submit a letter requesting a SEPA exempt determination with the environmental checklist and fee. The Community Development Director will review the request and if the application is determined to be SEPA exempt, a letter will be issued confirming the SEPA exempt status.

**Project Phasing**

The Checklist questions apply to all parts of your proposal, even if you plan to phase the project over a period of time or on different parcels of land. You must include any additional information that helps describe your proposal or its environmental effects. You may be asked to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact(s).

**SEPA Appeals**

Any agency or person may appeal a Determination of Non Significance (DNS) or Determination of Significance (DS) by completing and submitting an appeal form to the Hearing Examiner within fourteen (14) calendar days of the date the determination is final. Such appeals must be filed with the City Clerk. Appeals of environmental determinations under SEPA, including administrative appeals of a threshold determination, shall be heard by the Hearing Examiner and shall proceed pursuant to Chapter 22G.010 Article VIII *Appeals*. There is a nonrefundable \$500 Administrative Appeal fee to be submitted with appeal.

**A. Background** [Find help answering background questions](#)

<b>1. Name of proposed project, if applicable:</b>
Marysville Ford Pro Elite
<b>2. Name of applicant:</b>
Kendall Auto Group; 8854 W Emerald St, Ste. 260, Boise, ID 83704
<b>3. Address and phone number of applicant and contact person:</b>
Contact: Brian Kalab / Insight Engineering Co.; PO Box 1478, Everett, WA 98206; (425) 303-9363
<b>4. Date checklist prepared:</b>
10/25/2023
<b>5. Agency requesting checklist:</b>
City of Marysville
<b>6. Proposed timing or schedule (including phasing, if applicable):</b>
Project would begin upon receipt of all necessary development, building and grading permits.
<b>7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.</b>
There are no future plans for additions or expansion at this time.
<b>8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.</b>
A Drainage Report and Geotechnical Report will be submitted along with this Environmental Checklist.
<b>9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain.</b>
No known applications are pending at this time.
<b>10. List any government approvals or permits that will be needed for your proposal, if known.</b>
SEPA Determination and Site Plan Approval by City of Marysville
<b>11. Give a brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.)</b>
The project proposal is to develop the site by constructing a commercial truck service station and a parking lot.
<b>12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist.</b>
16100 Smokey Point Blvd., Marysville, WA 98271 Tax Parcel #: 31052900400600

## B. Environmental Elements

<b>1. EARTH</b> <a href="#">Find help answering earth questions</a>
<b>a. General description of the site, check all that apply:</b>
<input type="checkbox"/> Flat <input type="checkbox"/> Rolling <input type="checkbox"/> Hilly <input type="checkbox"/> Steep Slopes <input type="checkbox"/> Mountainous <input type="checkbox"/> Other:
<b>b. What is the steepest slope on the site (approximate percent slope)?</b>
2%
<b>c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them, and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils.</b>
Custer fine sandy loam, as per the USDA Natural Resources Conservation Service soil survey.
<b>d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.</b>
No indications or history of unstable soils in the immediate vicinity.
<b>e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill.</b>
Road and building sites would be cleared, graded and compacted as necessary. No more than 3,000 CY will be cut and no more than 3,000 CY will be filled, will engineered soils, which will be compacted to ensure stability.
<b>f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.</b>
Yes, the potential for on-site erosion would increase in the short-term where soils are exposed during site preparation and construction.
<b>g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?</b>
85%
<b>h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:</b>
A SWPPP will be submitted to the City for approval prior to any construction activities. Construction phase erosion control typically includes the use of silt fences, hay bales, and catch basin protection provided as necessary to minimize the impacts of erosion on off-site areas and on-site systems.
<b>2. AIR</b> <a href="#">Find help answering air questions</a>
<b>a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known.</b>
Short term emissions and odors would result from site preparation and construction activities. Long term would result from increased traffic to the site. These impacts are not expected to be significant.
<b>b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.</b>
None known.
<b>c. Proposed measures to reduce or control emissions or other impacts to air, if any.</b>
The Washington Clean Air Act requires the use of all known, available, and reasonable means of controlling air pollution, including dust. Construction impacts would not be significant.

<b>3. WATER</b> <a href="#">Find help answering water questions</a>
<b>a. Surface Water:</b> <a href="#">Find help answering surface water questions</a>
<b>(1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.</b>
No.
<b>(2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans.</b>
N/A
<b>(3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.</b>
N/A
<b>(4) Will the proposal require surface water withdrawals or diversions? Give a general description, purpose, and approximate quantities if known.</b>
No.
<b>(5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.</b>
No.
<b>(6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.</b>
Waste materials would not be discharged to surface waters as a result of these projects. Implementation of the drainage plan would minimize any discharging of waste materials by providing water quality in stormwater drainage facilities.
<b>b. Ground Water:</b> <a href="#">Find help answering ground water questions</a>
<b>(1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give a general description, purpose, and approximate quantities if known.</b>
No, does not apply.
<b>(2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (domestic sewage; industrial, containing the following chemicals...; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.</b>
N/A

<b>c. Water Runoff (including stormwater):</b>		
<b>(1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.</b>		
Proposed impervious surface water runoff shall be collected via conveyance systems within the road and conveyed to a regional detention pond that has been presized to meet flow control and water quality standards. Refer to drainage plan.		
<b>(2) Could waste materials enter ground or surface waters? If so, generally describe.</b>		
Oil, grease, and other pollutants from the additional paved areas could potentially enter the ground or downstream surface water runoff. Construction of the water quality features of the detailed drainage plan would provide adequate protection.		
<b>(3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.</b>		
No, does not apply.		
<b>(4) Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any.</b>		
Drainage facilities meeting city and state standards would be employed to control surface runoff during construction and after development.		
<b>4. PLANTS</b> <a href="#">Find help answering plants questions</a>		
<b>a. Check the types of vegetation found on the site:</b>		
<input type="checkbox"/> Deciduous Tree: alder, maple, aspen, other	<input type="checkbox"/> Crop or grain	<input type="checkbox"/> Orchards, vineyards, or other permanent crops
<input checked="" type="checkbox"/> Evergreen Tree: fire, cedar, pine, other	<input type="checkbox"/> Wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other	<input type="checkbox"/> Water plants: water lily, eelgrass, milfoil, other
<input checked="" type="checkbox"/> Shrubs	<input type="checkbox"/> Other types of vegetation	
<input checked="" type="checkbox"/> Grass		
<input type="checkbox"/> Pasture		
<b>b. What kind and amount of vegetation will be removed or altered?</b>		
Existing vegetation consisting of trees, shrubs, and grass will be cleared at the time of development.		
<b>c. List threatened and endangered species known to be on or near the site.</b>		
None known.		
<b>d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any.</b>		
All areas, exclusive of buildings and parking, will be landscaped by owners. Hydroseeding may possibly occur on barren areas per City requirements.		
<b>e. List all noxious weeds and invasive species known to be on or near the site.</b>		
None known.		
<b>5. ANIMALS</b> <a href="#">Find help answering animal questions</a>		
<b>a. Check any birds and other animals that have been observed on or near the site or are known to be on or near the site.</b>		
<b>Birds:</b>	<b>Mammals:</b>	<b>Fish:</b>
<input type="checkbox"/> Hawk	<input type="checkbox"/> Deer	<input type="checkbox"/> Bass
<input checked="" type="checkbox"/> Songbirds	<input type="checkbox"/> Beaver	<input type="checkbox"/> Herring
<input type="checkbox"/> Heron	<input type="checkbox"/> Bear	<input type="checkbox"/> Salmon
<input checked="" type="checkbox"/> Other: Crow & Robin	<input type="checkbox"/> Elk	<input type="checkbox"/> Shellfish
	<input type="checkbox"/> Rodents & Squirrels	<input type="checkbox"/> Trout
		<input type="checkbox"/> Other:

<b>b. List any threatened and endangered species known to be on or near the site.</b>
None known.
<b>c. Is the site part of a migration route? If so, explain.</b>
All of Western Washington is located in the Pacific Flyway. This site is not a significant factor in the Pacific Flyway.
<b>d. Proposed measures to preserve or enhance wildlife, if any.</b>
The applicant does not propose any measures to preserve or enhance wildlife.
<b>e. List any invasive animal species known to be on or near the site.</b>
None known.
<b>6. ENERGY AND NATURAL RESOURCES</b> <a href="#">Find help answering energy and natural resource questions</a>
<b>a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc.</b>
At time of completion of development: Electricity for lighting as well as electricity and/or natural gas would be used for heating.
<b>b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.</b>
No.
<b>c. What kinds of energy conservation features are included in the plans of this proposal? List other proposed measures to reduce or control energy impacts, if any.</b>
At the time of construction, the requirements of the international building code would be satisfied in the construction of the commercial building. Energy conservation materials would be utilized wherever possible throughout construction.
<b>7. ENVIRONMENTAL HEALTH</b> <a href="#">Find help with answering environmental health questions</a>
<b>a. Potential Site Contamination</b>
<b>(1) Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur because of this proposal? If so, describe.</b>
The project would not create any environmental health hazards.
<b>(2) Describe any known or possible contamination at the site from present or past uses.</b>
None known.
<b>(3) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.</b>
None known.
<b>(4) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.</b>
Hazardous waste cleanup of any fuel spillage associated with construction of this proposal.

<b>(5) Describe special emergency services that might be required.</b>
None known.
<b>(6) Proposed measures to reduce or control environmental health hazards, if any.</b>
At the time of construction, the project site would adhere to the Contractor's Safety Plan and Program.
<b>b. Noise</b>
<b>(1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)?</b>
Traffic on existing roads near the site would be audible. There are no other sources of noise that would affect the project.
<b>(2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site)?</b>
Short term impacts would be those associated with construction. Long term impacts would be those associated with the increase in site users and additional traffic. The increase in noise would be typical.
<b>(3) Proposed measures to reduce or control noise impacts, if any.</b>
Construction activities will comply with the Washington State noise ordinance. The commercial use is expected to be typical noises for the surrounding area.
<b>8. LAND AND SHORELINE USE</b> <a href="#">Find help answering land and shoreline use questions</a>
<b>a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe.</b>
The site is currently vacant. The surrounding properties to the north and south are care dealerships. The current proposal would not affect current land uses on nearby or adjacent properties.
<b>b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses because of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or non-forest use?</b>
No, to our knowledge the site has not been used as working farmland.
<b>(1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how?</b>
N/A. No known forestland or farmland borders the site.
<b>c. Describe any structures on the site.</b>
The site is vacant.
<b>d. Will any structures be demolished? If so, what?</b>
No.
<b>e. What is the current zoning classification of the site?</b>
General Commercial (GC)
<b>f. What is the current comprehensive plan designation of the site?</b>
GC
<b>g. If applicable, what is the current shoreline master program designation of the site?</b>
N/A

<b>h. Has any part of the site been classified as a critical area by the city or county? If so, specify.</b>
No.
<b>i. Approximately how many people would reside or work in the completed project?</b>
Up to 27 employees
<b>j. Approximately how many people would the completed project displace?</b>
None.
<b>k. Proposed measures to avoid or reduce displacement impacts, if any.</b>
None.
<b>l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any.</b>
The project will be controlled by the City of Marysville Land Use Control.
<b>9. HOUSING</b> <a href="#">Find help answering housing questions</a>
<b>a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.</b>
None.
<b>b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.</b>
None.
<b>c. Proposed measures to reduce or control housing impacts, if any.</b>
None.
<b>10. AESTHETICS</b> <a href="#">Find help answering aesthetics questions</a>
<b>a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?</b>
The Service Station is 29.4-feet tall at its highest point.
<b>b. What views in the immediate vicinity would be altered or obstructed?</b>
The finished project would not obstruct the surrounding view; however, the view will be altered due to the development.
<b>c. Proposed measures to reduce or control aesthetic impacts, if any.</b>
The design and appearance of the proposed project would be compatible with other uses in the area. Lot landscaping would be designed to complement the structure and site layout. Native vegetation will be retained and enhanced where practical.
<b>11. LIGHT AND GLARE</b> <a href="#">Find help answering light and glare questions</a>
<b>a. What type of light or glare will the proposal produce? What time of day would it mainly occur?</b>
Light and glare would be produced by exterior and interior lighting during evening hours and vehicle headlights traveling to and from the site.
<b>b. Could light or glare from the finished project be a safety hazard or interfere with views?</b>
The project would not interfere with views or cause hazards. Exterior lighting would be typical of commercial site.
<b>c. What existing off-site sources of light or glare may affect your proposal?</b>
The primary off-site source of light and glare would be from the existing commercial area lighting and vehicles traveling along the area roadways. Existing off-site sources of light and glare should not affect the proposal.
<b>d. Proposed measures to reduce or control light and glare impacts, if any.</b>
None proposed.

<b>12. RECREATION</b> <a href="#">Find help answering recreation questions</a>
<b>a. What designated and informal recreational opportunities are in the immediate vicinity?</b>
City parks and playgrounds are available in the area.
<b>b. Would the proposed project displace any existing recreational uses? If so, describe.</b>
No.
<b>c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any.</b>
None proposed.
<b>13. HISTORIC &amp; CULTURAL PRESERVATION</b> <a href="#">Find help with historic/cultural preservation questions</a>
<b>a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers? If so, specifically describe.</b>
No.
<b>b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources.</b>
No, none known.
<b>c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc.</b>
Referred to GIS data and Assessor's records.
<b>d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.</b>
None proposed.
<b>14. TRANSPORTATION</b> <a href="#">Find help with answering transportation questions</a>
<b>a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any.</b>
Site will be accessed via Smokey Point Blvd. The major roadway within the vicinity is SR-531, which also provides access to and from Interstate-5.
<b>b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop?</b>
The site is currently served by public transit approximately 0.2 miles away at Smokey Point Blvd. & 166th PI NE.
<b>c. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle, or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private).</b>
The applicable traffic mitigation fees will be paid to mitigate impacts to surrounding roadways.

<p><b>d. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.</b></p>
<p>The site is not anticipated to significantly impact water, rail or air transportation. The Arlington Municipal Airport is approximately 1.25 miles away to the southeast.</p>
<p><b>e. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would be trucks (such as commercial and non-passenger vehicles). What data or transportation models were used to make these estimates?</b></p>
<p>The development will add approximately 36 new AM peak-out trips and approximately 52 new PM peak-hour trips. The anticipated daily trip generation is approximately 177 new trips. See the traffic impact analysis for further information.</p>
<p><b>f. Will the proposal interfere with, affect, or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.</b></p>
<p>The development is not anticipated to significantly impact the movement of agriculture and forest products.</p>
<p><b>g. Proposed measures to reduce or control transportation impacts, if any.</b></p>
<p>The development is proposing to pay applicable mitigation fees for impacts to surrounding roadways.</p>
<p><b>15. PUBLIC SERVICES</b> <a href="#">Find help answering public service questions</a></p>
<p><b>a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe.</b></p>
<p>No.</p>
<p><b>b. Proposed measures to reduce or control direct impacts on public services, if any.</b></p>
<p>None.</p>
<p><b>16. UTILITIES</b> <a href="#">Find help answering utilities questions</a></p>
<p><b>a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other:</b></p>
<p>Electricity, natural gas, water, refuse service, telephone, sanitary sewer.</p>
<p><b>b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.</b></p>
<p>Water &amp; Sewer: City of Marysville; Power: Snohomish County PUD; Telephone: Frontier Communications; Natural Gas: Puget Sound Energy</p>

**C. Signature** [Find help about who should sign](#)

<p><b>The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.</b></p>
<p><i>X Brian Kalab</i></p> <hr/>
<p><b>Name of signee:</b> Brian Kalab</p>
<p><b>Position and agency/organization:</b> Insight Engineering Co.</p>
<p><b>Date submitted:</b> 10/25/2023</p>

**D. Supplemental sheet for non-project actions** [Find help for the nonproject actions worksheet](#)

**IT IS NOT REQUIRED** to use this section for project actions.

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

<b>1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?</b>
<b>Proposed measures to avoid or reduce such increases are:</b>
<b>2. How would the proposal be likely to affect plants, animals, fish, or marine life?</b>
<b>Proposed measures to protect or conserve plants, animals, fish, or marine life are:</b>
<b>3. How would the proposal be likely to deplete energy or natural resources?</b>
<b>Proposed measures to protect or conserve energy and natural resources are:</b>
<b>4. How would the proposal be likely to use or affect environmentally sensitive areas or areas designated (or eligible or under study) for governmental protection, such as parks, wilderness, wild and scenic rivers, threatened or endangered species habitat, historic or cultural sites, wetlands, floodplains, or prime farmlands?</b>
<b>Proposed measures to protect such resources or to avoid or reduce impacts are:</b>
<b>5. How would the proposal be likely to affect land and shoreline use, including whether it would allow or encourage land or shoreline uses incompatible with existing plans?</b>
<b>Proposed measures to avoid or reduce shoreline and land use impacts are:</b>

**6. How would the proposal be likely to increase demands on transportation or public services and utilities?**

**Proposed measures to reduce or respond to such demand(s) are:**

**7. Identify, if possible, whether the proposal may conflict with local, state, or federal laws or requirements for the protection of the environment.**
