Subject: Fire Flow

Good Afternoon Ken,

We performed a fire flow as requested at 9820 55th Ave NE, the results are as follows:

Static	71 psi
Residual	64 psi
Pitot	52 psi
GPM	1216
GPM @ 20 psi	3553

The test was performed using Hose Monster equipment with the gpm taken from their spreadsheet. The gpm @ 20 psi was figured using the calculator located on the Hose Monster website. Any questions, let me know.

Thank you,

Ryan Keefe
