CITY OF MARYSVILLE AGENDA BILL

EXECUTIVE SUMMARY FOR ACTION

CITY COUNCIL MEETING DATE: 10/27/14

AGENDA ITEM:	
Emergency Sewer Pump Purchase	
PREPARED BY:	DIRECTOR APPROVAL:
Kari Chennault, Water Resources Manager	0
DEPARTMENT:	416 Fee KAV -
Public Works	
ATTACHMENTS:	
Quote for purchase	
BUDGET CODE:	AMOUNT:
40142280.548000	\$95,924.93
SUMMARY:	

The City's 51st Avenue Sewer Lift Station pumps an average of 1.5 million gallons per day and is the City's largest lift station. The Lift Station has 3 critical pumps that are on a rotation. The site is currently equipped with an emergency generator powered by diesel to be used in emergency situations. In situations where power is interrupted and the generator is not triggered to respond, the Lift Station does not function and within around 15 minutes a sewerage overflow would occur into adjacent Quilceda Creek. The purchase of this emergency pump would allow for the Lift Station to be pumped and function in emergency situations such as PUD power loss, transfer switch failures, phase monitor relay failures, or other unforeseen circumstances that prevent the permanent lift station pumps from operating normally, and would prevent untreated sewage overflow to Quilceda Creek in these situations.

The attached pump was quote through the Helping Governments Across the County Buy (HGACBuy) Program which establishes competitively bid prices for goods and services. The City of Marysville participates in this Program by way of an Interlocal Contract.

RECOMMENDED ACTION:

Staff recommends that Council authorize the Mayor to approve the purchase of the pump in the amount of \$95,924.93.
