SUMMARY:	

The Planning Commission has recommended an amendment to the Unified Development Code to allow the establishment of mini-storage as a Conditional Use on a limited basis in the CB Community Business and GC General Commercial zones. The proposed amendment would apply only to an area located north of 100th Street NE, east of Interstate 5, and west of 47th Avenue NE. It would also be limited to properties without direct frontage on an arterial street, and that have access constraints that do not support retail, office or other permitted commercial uses.

The Conditional Use process will ensure notice to surrounding property owners.

The recommendation from the Planning Commission includes amendments to the existing standards for mini-storage uses.

Background information, including staff memos to the Planning Commission and the minutes from Planning Commission meetings on this item, can be found at the following link:

1. The property does not have direct frontage on an arterial street.
2. Vehicular access to the property is limited by physical constraints, such as railroad tracks, proximity to congested public street intersection where turning movements are restricted, or other physical barriers that limit convenient vehicular access for higher traffic-generating uses such as retail or office.
3. Buildings shall be located a minimum of 150 feet from the nearest arterial street or interstate highway right-of-way.

22C.170.040 Design considerations.

The following exterior design requirements apply to ~~a mini-storage facilities facility when located adjacent to or across a right-of-way from a residentially zoned or designated property.~~

(1) Architectural Features. Architectural features are to be consistent with the character of the surrounding neighborhood. The following are minimum standards.

(a) Minimum roof pitch is 4:12 for buildings with less than three floors.

(b) Exterior vertical surfaces require 50 percent of the area to be materials such as decorative brick veneer, stone, stucco, textured block, and other materials which reflect residential design elements.

(c) Unique architectural features such as towers, turrets and pergolas are subject to the standards of this subsection. An applicant is required to demonstrate that the proposed architectural features are consistent with the neighborhood character.

(d) Access points, except for emergency access, may not be from a local access street; provided that when a conditional use permit is required, the City may allow access from a local street if it determines traffic will not be disruptive to residential uses.

(e) Fencing is required to be low-maintenance material and articulation at intervals no greater than 20 feet. Chain-link fencing is not permitted.

(f) Display and floodlighting is required to be constructed, shielded and used so as not to directly illuminate, or create glare visible from, adjacent property or public right-of-way.

(g) A building or series of buildings parallel with and adjacent to residentially zoned or developed property or street frontage must have staggered setbacks for every ~~100~~ 50 feet of lineal development. The setbacks shall be stepped back or projected forward at intervals to provide a minimum of 40 percent facade modulation. The minimum depth of modulation should be ~~one~~ four feet ~~feet~~, and the minimum width should be ~~five~~ eight feet. There must be at least 10 feet of separation between buildings.

(h) Where allowed as a conditional use in the CB and GC zones, the following regulations shall apply:

(i) Outdoor storage of trucks, boats, recreational vehicles or other types of vehicles or equipment is permitted subject to the following standards:

(A) outdoor storage areas are not visible from abutting properties or public right-of-way through the use of buildings, or other method of solid screening; and

(B) the area devoted to outdoor storage is less than fifty percent of the footprint of the storage building(s).

(ii) Buildings shall have a minimum height of three floors, except in the following circumstances:

(A) When there is more than one building, only buildings located within fifty feet of a public street shall have a height of three floors; or

(B) The City may allow less than three floors if the applicant proposes an architectural and landscape design quality that is superior to what is otherwise required by development standards and design guidelines applicable to a building containing three floors. To determine if the quality is superior, the scale and design of the building, exterior building materials and landscaping treatment proposed must be comparable to what would be required for a retail or office building. The City shall take into consideration compatibility of the proposed design with existing development, or the likely future development, of surrounding properties.

(2) Landscaping and Screening. The following landscaping and screening requirements apply to all mini-storage facilities:

(a) All setback areas shall be landscaped with a variety of trees, shrubs and ground cover plants consistent with L2 landscaping as defined under Chapter [22C.120](#) MMC, Landscaping and Screening.

(b) A solid wall, a screening fence or a combination of both achieving a perimeter screening to a minimum of six feet in height is required and shall be located so that a minimum of 75 percent of the landscaping area is outside the fence.

~~(c) All use of the site shall comply with the city noise standards stated in Chapter [6.76](#) MMC. (Ord. 2852 § 10 (Exh. A), 2011).~~
