HWA Project No. 2016-023-21

City of Marysville
80 Columbia Avenue
Marysville, Washington 98270

Attention: Ms. Kari Chennault

Subject: **PHASE I ENVIRONMENTAL SITE ASSESSMENT UPDATE**
Welco Property
Marysville, Washington

Dear Ms. Chennault:

This letter report presents the results of the HWA GeoSciences Inc. (HWA) Phase I Environmental Site Assessment (ESA) Update conducted for a property located at 1218 1st Street, in Marysville, Snohomish County (Tax ID# 30053300202400), Washington (herein referred to as the Subject Property).

This work was conducted for the City of Marysville (City), who is considering purchasing the Subject Property and redeveloping it as a passive recreational area/park. The Subject Property is located on the southwest corner of the intersection of 1st Street and Cedar Avenue. Figure 1 shows the Subject Property location and vicinity.

This project was performed in response to HWA's proposal to the City (HWA Proposal No. 2016-P023A-21), which was authorized on December 13, 2016. The scope of work for the Phase I ESA Update was performed in general accordance with American Society of Testing and Materials (ASTM) standard E-1527-13.

PROJECT OBJECTIVE

HWA completed a Phase I and II ESA of the Subject Property in May 2016. Per All Appropriate Inquiries (AAI) noted in Title 40 Code of Federal Regulations (CFR), Chapter I, Subchapter J, Part 312 (40 CFR Part 312), AAI must be conducted within one year prior to the date of acquisition of a property. ASTM standard E-1527-13 also indicates that a Phase I ESA report is considered valid for a period of one year from the date of issue of the report. Both the AAI and ASTM standard note that components of a Phase I ESA must be updated if the report issue date is more than 180 days from the acquisition date of a property. In these cases, the following updated components must be completed within 180 days of the date of the intended transaction:

- interviews with past and present owners, operators, and occupants;
- searches for recorded environmental cleanup liens;
- reviews of federal, tribal, state, and local government records;

21312 30th Drive SE
Suite 110
Bothell, WA 98021-7010
Tel: 425.774.0106
Fax: 425.774.2714
www.hwageo.com

- visual inspections of the property and of adjoining properties; and
- the declaration by the environmental professional responsible for the assessment or update.

The primary objective of the Phase I ESA Update was to evaluate the Subject Property for *recognized environmental conditions* (RECs), historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs) associated with the Subject Property since completion of the May 2016 Phase I ESA. This Phase I ESA Update was performed in accordance with the scope of work and procedures included in the American Society for Testing and Materials Standard Practice E1527-13 (ASTM E1527-13) and the Code of Federal Regulations Title 40 Part 312 (40 CFR 312).

SCOPE OF SERVICES

The scope of services for this Phase I ESA Update project focused on the time frame from the May 2016 Phase I ESA to the present and included the following:

- Brief description of the current and historical uses of the Subject Property;
- Perform reconnaissance of the Subject Property and cursory reconnaissance of adjoining properties;
- Interview owners/operators, past owners/operators, local government agencies, or other knowledgeable persons regarding any changes to the Subject Property use and conditions since May 2016;
- Conduct an environmental database review, which includes review of federal, tribal, and state databases of contaminated properties or properties that utilize hazardous materials, within ASTM standard parameters for the Subject Property and surrounding area;
- Conduct agency file review for the Subject Property and/or adjoining properties (if deemed necessary and feasible within the requested timeframe of the project);
- Review of any previous environmental reports completed since the May 2016 Phase I ESA;
- Prepare the Phase I ESA Update letter report that is in compliance with the AAI Final Rule at 40 CFR Part 312 and ASTM E1527-13 standards.

SUBJECT PROPERTY DESCRIPTION

The Subject Property is addressed at 1218 1st Street, Marysville, Snohomish County, Washington (Snohomish County tax parcel number 30053300202400). The Subject Property is approximately 5 acres in size and is located in a commercial and light industrial area of Marysville. The Subject Property and nearby vicinity slope gently to the south. Elevations range from approximately 15 to 0 feet above mean sea level (MSL) across the Subject Property. The nearest surface water body is Ebey Slough, which borders the Subject Property to the south. Based on a review of regional topography, inferred ground water flow direction is to the south, toward Ebey Slough. Figures 1 and 2 show the location and vicinity of the Subject Property.

CURRENT USE OF SUBJECT PROPERTY ADJOINING PROPERTIES

The Subject Property is a vacant lumber mill and shingle company that ceased operations in 2007. The majority of the former lumber mill/shingle company buildings have been removed

from the Subject Property except for an office building and an open walled small log sawmill. Adjoining property use includes:

- North – 1st Street, beyond which are commercial properties consisting of a Washington State Vehicle Emissions Test Center (northwest), a vacant lot, a vacant commercial building, Polaris Machining (north), and Marysville Mall (northeast)
- South – Ebey Slough
- West– 60th Place Northeast and the overpass of Interstate 5, with lightly vegetated lands in the vicinity.
- East – Railroad tracks, beyond which are Western Auto Recovery (automobile restoration services) and the former Geddes Marina, also owned by the City.

SUMMARY OF PREVIOUS ENVIRONMENTAL REPORTS

URS Corporation 2008 Phase I ESA

At the time of the 2008 Phase I ESA, the Subject Property consisted of inactive mill buildings, (a small log sawmill, cedar fencing mill, equipment/vehicle maintenance shop, ancillary buildings/sheds, miscellaneous logging equipment such as the green chain for moving lumber, railroad loading dock, and sawdust and chip hoppers), the Welco office building, finished lumber storage areas, and a storm water pretreatment facility.

RECs identified by URS at the Subject Property during the 2008 Phase I ESA included:

- Potential oil impacts to soil from staining observed adjacent to the saw filing and knife sharpening areas in the small log sawmill and deteriorated concrete floor in the equipment maintenance room in the northwest portion of the small log sawmill building;
- Two historic gasoline USTs with capacities of 1,100-gallons or less were removed from the Subject Property in the 1980s. The exact locations of these USTs was unknown and no documentation regarding soil and/or ground water conditions in the vicinity of these former USTs was identified. However, a document dating from 1989 notes that one of the USTs was previously located in an area that was covered by a “sawmill building.” Leaks that may have been associated with these former USTs and their associated product piping were considered to be a potential environmental concern for the soil and ground water in the vicinity of these USTs; and
- The historic use of the Subject Property as a mill and the lack of impermeable asphalt surfaces in chemical and petroleum storage areas until the 1990s were thought to have the potential to adversely affect the soil and/or ground water if accidental releases had occurred.

HWA May 2016 Phase I ESA

At the time of HWA’s May 2016 Phase I ESA, the Subject Property consisted of a vacant lumber mill and shingle company that was being utilized by the Washington State Department of Transportation (WSDOT) as a construction staging area. The majority of the former lumber mill/shingle company buildings had been removed from the Subject Property except for the existing office building and small log sawmill building.

RECs identified by HWA for the Subject Property during the May 2016 Phase I ESA included:

- **Former Lumber Mill:** From approximately 1910 to 2007, the Subject Property was utilized as a lumber mill. Features associated with the lumber mill that could have an adverse impact on the Subject Property included, but were not limited to, several areas of fuel storage, a chemical storage container, two former oil house locations, a former blacksmith shop, waste oil storage areas, general waste storage areas, a storm water treatment facility, steam dry kilns, boilers, vehicle/equipment wash areas, and storage of lumber (possibly treated lumber) and other potentially hazardous materials on previously unpaved areas of the Subject Property. Based on the unknown use, storage, and/or disposal practices of chemicals and hazardous wastes associated with the lumber mill, the former use of the Subject Property as a lumber mill was considered to be a significant risk to the soil and/or ground water and was therefore a REC.
- **Former Automotive Repair Facilities:** Two buildings that were utilized for automobile repair activities were previously located on the Subject Property. In 1942 a building noted as “Autos” was located along the northern border of the Subject Property. In addition, from 1985 to 2007, a maintenance shop that was utilized for automobile and logging equipment repair was located on the southeast portion of the Subject Property. The likelihood existed that petroleum hydrocarbons, solvents, metals, and/or associated wastes were stored and utilized at these former automotive repair facilities. Therefore, the former automobile repair facilities were a potential risk to the soil and/or ground water at the Subject Property and were considered a REC.
- **Other Former Occupants:** In addition, the Subject Property had also been occupied by a “hand printing” facility (1892, northwest corner of the Subject Property) and an undertaker (1902, northeast portion of the Subject Property). The unknown use, storage, and disposal practices of chemicals and/or hazardous materials associated with these former uses was unknown and considered to be a potential risk to the soil and/or ground water at the Subject Property. Therefore, these former uses of the Subject Property were considered to be a REC.
- **Historical USTs:** Two historical USTs were identified as having formerly been utilized at the Subject Property. One UST was reportedly a 500 to 1,100-gallon leaded gasoline UST that was removed from below the footprint of the small log sawmill building. The second UST was noted to be between 0 to 500-gallons but the contents, location, and outcome (e.g., decommissioned, abandoned in place) of this UST were not identified. No documentation regarding the exact locations of these USTs or information regarding any sampling of subsurface soils or ground water in the vicinity of the USTs were identified. Based on the unknown condition of the subsurface environment in the vicinity of these USTs, the former USTs were considered a significant risk to the soil and/or ground water of the Subject Property and were therefore a REC.
- **Historical ASTs:** Previous environmental reports indicated that a 200-gallon gasoline AST was reportedly formerly located “within a few feet east of the Small Log Mill north of the green chain (machine).” Historical documents also noted that a “gas tank” (likely an AST) was located approximately 20 feet east of the small log mill and 30 feet north of

the green chain machine. It was considered possible that the above-mentioned gasoline AST and “gas tank” were the same feature. In addition, during the Phase II ESA field activities (refer to the 2016 combined Phase I and II ESA report for details), the driller that performed the Phase II ESA drilling stated that a diesel AST was previously located off the northwest corner of the former maintenance building on the southeast portion of the Subject Property. Based on the lack of information regarding these ASTs and the unknown condition of the subsurface environment in the vicinity of the ASTs, the former ASTs were considered a moderate risk to the soil and/or ground water of the Subject Property and were therefore a REC.

- **Staining on Asphalt Paved Surfaces:** Moderate to significant staining was observed on asphalt paved surfaces on the north and south central portions of the Subject Property. It was unknown if this staining is a result of historical uses of the Subject Property or use of the Subject Property by WSDOT (likely the former). The staining observed indicated the potential for releases of petroleum products or other hazardous materials that may have occurred on the Subject Property. The areas of stained asphalt were considered a moderate risk to the soil and/or ground water of the Subject property and were therefore a REC.

HWA May 2016 Phase II ESA

On March 31, 2016, an electromagnetic (EM) survey of selected areas of the Subject Property was conducted with EM surveyed areas also profiled using ground penetrating radar (GPR). No anomalies or suspect former UST locations or abandoned USTs were identified. Areas surveyed are depicted on Figure 3.

On April 4 and 5, 2016, nineteen soil borings were advanced to depths of up to 10 feet below ground surface (bgs) at the Subject Property. The locations of the Phase II ESA subsurface borings were based on the information obtained during the May 2016 Phase I ESA regarding the historical uses and associated features, and observations made during the HWA Phase I ESA reconnaissance. Soil boring locations are shown on Figure 3. Select soil and ground water samples collected during the 2016 Phase II ESA were analyzed for one or more of the following compounds of concern: gasoline, diesel, and oil-range petroleum hydrocarbons, metals, volatile and semivolatile organic compounds, polycyclic aromatic hydrocarbons, and polychlorinated biphenyls.

A summary of the general geologic conditions, based on HWA’s April 2016 observations and soils encountered, is described below in order of general increasing depth:

- Fill soils consisting of loose brown to gray sand with varying amounts of silt, gravel and organics (generally consisting of wood particles) were encountered from below the ground surface to depths of approximately 3 to 9 feet bgs. Fill was encountered to the termination depth of 10 feet bgs in borings B-4, B-8, and B-19.
- Loose to medium dense, brown to gray silt with varying amounts of sand, gravel, and organics, interpreted to be Younger Alluvium, was encountered below the fill to a maximum depth of 10 feet bgs.

Temporary ground water monitoring wells were installed in 12 of the 19 test probe borings advanced. Ground water was encountered at depths ranging from approximately 4 to 5 feet bgs. The inferred direction of ground water flow direction at the Subject Property is to the south toward Ebey Slough, which borders the Subject Property to the south.

Analytical data from HWA's Phase II ESA investigation indicated that concentrations of total petroleum hydrocarbons (TPH) above the Department of Ecology Model Toxic Control Act (MTCA) Method A cleanup levels are present in soils on the northwest, western, and southern portions of the Subject Property. In addition, a lead concentration well above the cleanup level was also identified in soils from the vicinity of a former chemical storage container located in the northwest portion of the Subject Property. Ground water samples collected from the northwest interior area of the vacant small log sawmill building and the south portion of the Subject Property also exhibited concentrations of TPH above cleanup levels. In addition, ground water samples collected at the south portion of the Subject Property also exhibited concentrations of arsenic, chromium, and lead that were above regulatory cleanup levels.

HWA concluded that the soil and ground water impacts identified in multiple areas of the Subject Property likely represented multiple, separate releases, none of which had been fully characterized with respect to lateral or vertical extent. HWA also stated that ground water impacts at the southern end of the property may be discharging into surface water (Ebey Slough). Based on the results of HWA's combined Phase I and Phase II ESA, the potential for encountering contaminated soils and ground water below other areas of the Subject Property was considered likely.

UPDATED RECONNAISSANCE OF SUBJECT PROPERTY

HWA performed an updated reconnaissance of the Subject Property on December 15, 2016. The purpose of the updated reconnaissance was to identify:

- Changes in occupancy and usage of the Subject Property that may have occurred since May 2016 to the present day;
- Current conditions of the Subject Property; and
- Changes in adjacent property usage that may have occurred since May 2016 to the present day.

At the time of the December 2016 reconnaissance, the Subject Property consisted of a vacant lumber mill and shingle company property. An office building was located on the northeast portion of the Subject Property and an open walled small log sawmill building occupied the western portion of the property.

Other than the discontinuation of the use of the Subject Property as a construction staging area for WSDOT, no significant changes in land use or environmental conditions were noted with regards to the Subject Property since the March 2016 Phase I ESA reconnaissance.

Areas of moderate staining and/or sheens were observed on asphalt surfaces and frozen standing water on the eastern and north central portions of the Subject Property. Based on the amount of

staining/sheens observed in these areas, the staining/sheens in these areas are still considered to be a REC.

Two 55-gallon drums were observed to be stored on the asphalt surface of the southeast portion of the Subject Property. These drums store soil cuttings and purge water from HWA's April 2016 Phase II ESA drilling activities. No staining, sheens, adverse odors or other indications of spills or releases were noted in the vicinity of these drums.

No other suspect staining, stressed vegetation, or adverse odors were noted with regards to the Subject Property. In addition, no chemical storage, indications of USTs, ASTs, hazardous materials, groundwater monitoring wells, or other indications of hazardous releases were noted during the reconnaissance of the Subject Property.

Photographs of the Subject Property and adjoining properties are included in Appendix B.

UPDATED INTERVIEWS

User/Owner

HWA interviewed Ms. Kari Chennault of the City of Marysville on December 13, 2016. Ms. Chennault was not aware of any significant changes in the use or environmental condition of the Subject Property since May 2016. Ms. Chennault stated that to the best of her knowledge, the Subject Property has been vacant since WSDOT ceased use of the property as a construction staging facility.

HWA interviewed Mr. Larry Maechler, with Merrill & Ring (timber and land management company for Welco Lumber), on December 15, 2016. According to Mr. Maechler, WSDOT vacated the property "a couple months ago" and there have been no other uses of the Subject Property since the lumber mill ceased operations in 2007. Mr. Maechler did not have information regarding the former heat source of the existing or former buildings associated with the Subject Property. In addition, Mr. Maechler did not have specific details regarding the hazardous material or chemical use, storage and/or disposal practices, USTs or ASTs, imported fill soils, or contamination issues associated with the Subject Property.

In addition, HWA interviewed Mr. Peter Stroble of Welco Lumber Company on December 16, 2016. Mr. Stroble stated that WSDOT ceased operations at the Subject Property in August 2016 and that there have been no other uses of the Subject Property since the lumber mill closed down in 2007. Mr. Stroble indicated that other than the knowledge of contamination identified during the 2016 Phase II ESA, he is not aware of any other significant changes in the environmental condition of the Subject Property.

Interviews with Local Agencies

HWA contacted the Marysville Fire District regarding records of ASTs, USTs, hazardous materials information or responses to fires for the Subject Property from February 2016 to the present day. The Marysville Fire District representative stated that no records were identified for the Subject Property.

HWA contacted the City of Marysville Building Services Department regarding any new records for the Subject Property that had become available since February 2016. The City of Marysville representative stated that no records were identified for the Subject Property.

HWA contacted the Snohomish County Health District regarding any new records for the Subject Property from February 2016 to the present day. The Snohomish County Health District representative stated that no records were identified for the Subject Property.

ASTM E1527-13 User Questionnaires

Ms. Kari Chennault, with the City of Marysville, completed the User Questionnaire, which is included in Appendix C.

Mr. Peter Stroble, with Welco Lumber Company, completed the User Questionnaire, which is included in Appendix C.

Environmental Lien and Activity Use Limitation

Environmental lien and activity use limitation documents for the Subject Property were not provided and were therefore not reviewed. However, Ms. Kari Chennault noted on the User Questionnaire that the City of Marysville had checked for environmental liens that may be filed or recorded against the Subject property and that no such liens were identified. Ms. Chennault also noted that she was not aware of any possible activity use limitations for the Subject Property.

AGENCY DATABASE REVIEW

Subject Property

The purpose of the records review is to obtain and review records that will help identify RECs in connection with the Subject Property. HWA contracted Environmental Data Resources Inc. (EDR) to conduct a review of regulatory databases. Appendix D contains the complete EDR report, including a table summarizing the results of the database search, and maps showing the approximate locations of identified sites. Table 1 provides a summary of the lists reviewed, search radii, and corresponding acronyms. Table 2 provides a summary of sites that may be considered RECs with respect to the Subject Property.

The EDR report identified the Subject Property as being listed on the Environmental Protection Agency's (EPA's) Facility Index System/Facility Registry System (FINDS), Federal Insecticide, Fungicide and Rodenticide Act (FIFRA)/Toxic Substance Control Act (TSCA) Tracking System (FTTS), Historical FTTS, Enforcement & Compliance History Online Information (ECHO), and Integrated Compliance Information System (ICIS) databases. When compared to the May 2016 Phase I ESA, new database listings identified for the Subject Property are the ECHO and ICIS databases, which are both regulatory tracking databases with no changes in environmental conditions identified for the Subject Property. The Subject Property is listed due to a Section 6 polychlorinated biphenyls (PCB) State Conducted inspection that occurred in 1991. No violations were noted as being on record with regards to the EPA database listings. Based on the status of these database listings (no violations on record), an EPA regulatory agency file review

was not requested and the EPA database listings are not considered to indicate a significant risk to the environmental condition of the Subject Property.

In addition, the Subject Property is listed on Ecology's Underground Storage Tank (UST) and Facility/Site Identification System Listing (ALLSITES) databases. According to these database listings, the Subject Property had an approximately 111 to 1,100-gallon steel UST with above ground piping that was removed from the property prior to 1996. The Subject Property was noted to be listed on the ALLSITES database for the UST database listing and for industrial storm water general permitting.

Adjoining Properties

The EDR report identified three adjoining properties as being listed on EDR's Historical Auto Station (EDR Hist Auto) database. These EDR Hist Auto properties consisted of the former north-adjoining Marysville Trailer Supply & Repair Inc. (EDR# 3), the existing east-adjoining Western Auto Recovery Property (EDR# 4), and the existing northwest-adjoining Washington State Motor Vehicle Emissions property (EDR# 5). No regulatory agency files are associated with the EDR Hist Auto database. Therefore, a regulatory agency file review was not requested with regards to these database listings.

The east-adjoining Geddes Marina property (EDR# 6) is listed on Ecology's Confirmed and Suspected Contaminated Sites List (CSCSL) and ALLSITES databases and EPA's Brownfields database. According to these database listings, the Geddes Marina property has arsenic, lead, "metals- other," non-halogenated solvents, "other non-halogenated solvents," "other non-halogenated organics," diesel, and "petroleum- other" at concentrations above regulatory cleanup levels the soil, ground water, and/or sediments at the property.

Other nearby sites were listed in the EDR report. However, based on the nature or status of the database listings for these properties, the distance and/or location of these properties relative to the Subject Property; these other nearby sites appear unlikely to impact the subject property.

HWA also reviewed the EDR 'Orphans' list of unmapped sites. Seven sites were listed. Based on HWA's review of these sites and field observations, the listed sites are outside of the applicable search radii or appear unlikely to impact the Subject Property.

Appendix D contains a complete list of databases searched, location maps, and information on the individual facilities.

**TABLE 2
SITES WITH RECOGNIZED ENVIRONMENTAL CONDITIONS
BASED ON REGULATORY RECORD SEARCHES**

Site Name and Address	Map ID Code	Distance ²	Database Listing ³	Contaminant	Media	Condition	REC ¹ Y/N
Geddes Marina	6	East-Adjoining Property	CSCSL, Brownfields and ALLSITES	Metals, non-halogenated solvents, non-halogenated organics, petroleum products	Soil, ground water and/or sediments	Awaiting cleanup	N

1. Recognized environmental conditions for the Subject Property listed in the Conclusions section of this report and are the outcome of the entire Phase I ESA Update discernment process.
2. The distance field contains approximate distance, direction and whether the site is higher or lower
3. See EDR report, Appendix D

REGULATORY AGENCY FILE REVIEW

At the time of the May 2016 Phase I ESA, HWA was provided copies of all available Ecology UST file documents regarding the Subject Property. According to the Ecology UST file, a 500 to 1,100-gallon, steel, leaded gasoline UST with aboveground piping was installed on the Subject Property prior to 1970 and was removed from the Subject Property in approximately 1987. Although this removed UST was noted to have been located below the footprint of “a sawmill building,” no documentation regarding the exact location of this UST or information regarding any sampling of subsurface soils or ground water in the vicinity of the UST were noted in the Ecology UST documents provided.

As part of the 2008 Phase I ESA, URS Corporation performed an Ecology file review for the Subject Property. This file review indicated that two USTs were associated with the Subject Property. One of these USTs was removed from an area that is now below the footprint of the small log sawmill building. The status of the second UST (removed, decommissioned in place, abandoned, etc.) was not identified. At the time of the URS Ecology file review, no figures or description of the exact locations of these USTs or information regarding any sampling of subsurface soils or ground water in the vicinity of the USTs was identified.

After completion of the May 2016 Phase I ESA, HWA was granted an appointment to review all available documents pertaining to the east-adjointing Geddes Marina property. Ecology files indicate that soil, ground water, and sediments within the boat basin on the Geddes Marina property contain concentrations of petroleum hydrocarbons, metals and carcinogenic polynuclear aromatic hydrocarbons (cPAHs) above the regulatory cleanup levels. The petroleum hydrocarbon and cPAH contamination appeared to be concentrated on the southeast portion of the marina property. Based on review of the Geddes Marina Ecology documents and the distance, cross gradient location, and lower elevation of the Geddes Marina property relative to the Subject Property, the Geddes Marina property is not considered to be a significant risk to the soil and/or ground water quality of the Subject Property. Therefore, the Geddes Marina property is not considered to be a REC at this time.

DATA GAPS

Data gaps (as defined in 40 CFR Part 312.10) in the information obtained as part of the all appropriate inquiry affect the Environmental Professional's ability to identify conditions indicative of releases or threatened releases of hazardous substances, pollutants, contaminants, petroleum and petroleum products, and controlled substances on, at, in, or to the Subject Property. No data gaps were identified that would significantly impact the findings of this study.

PHASE I ESA UPDATE FINDINGS AND CONCLUSIONS

HWA performed a Phase I ESA Update of the Welco Property in general accordance with the scope and limitations of 40 CFR 312 and ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described herein. Our conclusions are essentially unchanged from our May 2016 ESA, namely that this assessment revealed no evidence of *recognized environmental conditions* in connection with the Subject Property, with the exception of the following:

- **Former Lumber Mill:** From approximately 1910 to 2007, the Subject Property was utilized as a lumber mill. The use, storage, and/or disposal practices of chemicals and hazardous wastes associated with the lumber mill are unknown. HWA completed a 2016 Phase II ESA investigation of the Subject Property that identified several compounds of concern in the soil and/or ground water at the Subject Property that were associated with the former lumber mill use. The 2016 Phase II ESA noted that other areas of contamination associated with the former lumber mill use could be present on the Subject Property. Therefore, the former use of the Subject Property as a lumber mill is considered to be a significant risk to the soil and/or ground water and is therefore a REC.
- **Former Automotive Repair Facilities:** Two buildings that were utilized for automobile repair activities were previously located on the Subject Property. The likelihood exists that petroleum hydrocarbons, solvents, metals, and/or associated wastes were stored and utilized at these former automotive repair facilities. HWA completed a 2016 Phase II ESA in the vicinity of these former automotive repair facilities that identified compounds of concerns in the soil and/or ground water in the vicinity of the former automobile repair facility on the southeast portion of the Subject Property. However, additional areas of contamination associated with former automotive repair facilities could be present at the Subject Property. Therefore, the former automobile repair facilities are a potential risk to the soil and/or ground water at the Subject Property and are considered a REC.
- **Other Former Occupants:** In addition, the Subject Property has also been occupied by a "hand printing" facility (1892, northwest corner of the Subject Property) and an undertaker (1902, northeast portion of the Subject Property). The unknown use, storage, and disposal practices of chemicals and/or hazardous materials associated with these former uses is unknown and considered to be a potential risk to the soil and/or ground water at the Subject Property. Therefore, these former uses of the Subject Property are considered to be a REC.
- **Historical USTs:** Two historical USTs were identified as having formerly been utilized at the Subject Property. One UST was reportedly a 500 to 1,100-gallon leaded gasoline UST that was removed from below the footprint of the small log sawmill building. The

second UST was noted to be between 0 to 500-gallons but the contents, location, and outcome (e.g., decommissioned, abandoned in place) of this UST were not identified. No documentation regarding the exact locations of these USTs or information regarding any sampling of subsurface soils or ground water in the vicinity of the USTs were identified. As part of the 2016 Phase II ESA, a geophysical survey was conducted in an attempt to locate any abandoned or former UST locations. No such locations were found. Based on the unknown condition of the subsurface environment in the vicinity of these USTs, the former USTs are considered a significant risk to the soil and/or ground water of the Subject Property and are therefore a REC.

- **Historical ASTs:** Previous environmental reports indicated that a 200-gallon gasoline AST was reportedly formerly located “within a few feet east of the Small Log Mill north of the green chain (machine).” Historical documents also noted that a “gas tank” (likely an AST) was located approximately 20 feet east of the small log mill and 30 feet north of the green chain machine. It is possible that the above-mentioned gasoline AST and “gas tank” were the same feature. In addition, during HWA’s Phase II ESA field activities, the driller that performed the Phase II ESA drilling stated that a diesel AST was previously located off the northwest corner of the former maintenance building on the southeast portion of the Subject Property. Based on the lack of information regarding these ASTs and the unknown condition of the subsurface environment in the vicinity of the ASTs, the former ASTs are considered a moderate risk to the soil and/or ground water of the Subject Property and are therefore a REC.
- **Staining on Asphalt Paved Surfaces:** Moderate staining was observed on asphalt paved surfaces and frozen standing water on the north and south central portions of the Subject Property. The staining observed indicates the potential for releases of petroleum products or other hazardous materials that may have occurred on the Subject Property. The areas of stained asphalt are considered a moderate risk to the soil and/or ground water of the Subject property and are therefore a REC.

The soil and ground water impacts identified during the 2016 Phase II ESA were in multiple locations of the Subject Property, and likely represent multiple, separate releases, none of which have been fully characterized with respect to lateral or vertical extent. In order to assess the full impacts to this property or develop accurate cleanup cost estimates, it is HWA’s opinion that further investigations would be required. In addition, based on the results of the Phase I and Phase II ESAs, there is the potential for encountering contaminated soils and ground water below other areas of the Subject Property that have not yet been investigated.

LIMITATIONS

The conclusions expressed by HWA are based solely on material referenced in this report. Observations were made under the conditions stated. Within the limitations of scope, schedule and budget, HWA attempted to execute these services in accordance with generally accepted professional principles and practices in the area at the time the report was prepared. No warranty, expressed or implied, is made. HWA's findings and conclusions must not be considered as scientific or engineering certainties, but rather as our professional opinion concerning the significance of the limited data gathered and interpreted during the course of the assessment.

Unless specifically stated in the report, HWA has not performed specific testing or analysis to determine the presence or absence of any chemical, physical, radiological, or biological hazard or condition, including, but not limited to: wetlands, endangered species issues, asbestos containing materials, lead-based paint, lead in drinking water, or radon.

This report has been prepared on behalf of the City of Marysville, for the specific application to the Subject Property. This report and the findings contained herein shall not, in whole or part, be disseminated or conveyed to any other party without prior written consent of HWA. We are not responsible for the impacts of any changes in environmental standards, practices, or regulations subsequent to performance of services. We do not warrant the accuracy of information supplied by others, nor the use of segregated portions of this report.

HWA employees Mr. Arnie Sugar and Ms. Nicole Kapise, both Environmental Professionals as defined in ASTM Practice E-1527-13, conducted this Phase I ESA Update. Appendix A contains Mr. Sugar's and Ms. Kapise's resumes.

We appreciate the opportunity to provide you with this proposal. Please feel free to call if you have any questions or need additional information.

Sincerely,

HWA GEOSCIENCES INC.

APPENDIX A
RESUMES

December 19, 2016
HWA Project No. 2016 023

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

BS, Biology, Lafayette College, Pennsylvania, 1981

PROFESSIONAL REGISTRATIONS

Licensed Geologist and Hydrogeologist: 2000/Washington No. 170
Licensed Geologist: 1990/Idaho No. 674, 1990/California No. 4986

AFFILIATIONS

National Ground Water Association, Washington Hydrologic Society

EXPERIENCE

Mr. Sugar has 26 years of experience in geology, hydrogeology, environmental consulting and remediation, including extensive experience in designing and conducting environmental site assessments, from Phase One Property Transaction Assessments to site-specific ground water and soil investigations. He has worked with a variety of contaminants, media and investigative techniques, and designs site assessment to match these variables.

SELECTED PROJECTS

Snohomish 4th and Maple, Snohomish, Washington. Arnie conducted a Phase II Environmental Site Assessment and storm water infiltration evaluation of 1.3 acre site slated for development of a senior center and trail access.

Seattle City Light On-Call Environmental Services, Seattle, Washington. Managed on-call environmental consulting services contract including site characterization, Phase I and II site assessment, remediation design, waste management, risk assessment and site closure on over 30 task orders

Lake Stevens Wastewater Treatment Plant, Lake Stevens, Washington. Performed a Phase I Environmental Site Assessment of future wastewater treatment plant site, and assisted with handling soil contamination encountered during construction of other wastewater improvements.

Duwamish Substation and Georgetown Pump Station, Phase I & II ESAs, Seattle, Washington. Conducted Phase I and Phase II Environmental Site Assessments at sites under consideration for potential wetlands mitigation and shoreline restoration.

Bothell Crossroads, Bothell, Washington. Mr. Sugar managed this project that has multiple Phase I and II environmental site assessments for roadway realignment project. Additionally, he provided support services for multiple property acquisition negotiations, provided remediation cost estimates, regulatory compliance, negotiation, and grant funding support. Mr. Sugar also prepared SEPA/NEPA discipline reports for soils, ground water, and hazardous materials.

Ship Canal Trail, Seattle, Washington. Conducted Phase I and II environmental site assessments of an approximately 0.75-mile alignment along the Seattle Ship Canal. Completed Preliminary Site Investigation (Phase II site investigation), which included soil and ground water sampling and analysis. Prepared a Hazardous Materials Discipline Report for use in a SEPA Environmental Assessment.

East Marine View Drive, Everett, Washington. Conducted soil sampling for planned roadway and utility improvements project, in area impacted by heavy metals from the former Everett ASARCO Smelter. Obtained regulatory approval and developed a streamlined soil management plan for construction, allowing the contractor to manage soils based on location, without further testing during construction. Soil management options included reuse on site, on-site fill under pavement, and off site disposal.

Sound Transit Light Link Rail Phase I-II Site Assessments, Seattle, Washington. Managed over 20 Phase I and 6 Phase II environmental site assessments, some of which occurred concurrently. Each included a strict budget and schedule, which were adhered to. Phase I site assessments included data review, site reconnaissance, and preparation of standardized reports for Sound Transit's property acquisition program. Phase II investigations included data review, preparation of work plans, drilling and sampling soil borings and probes, and preparing site assessment reports. The Phase II investigations were designed with future site use in mind (e.g., explorations focused on areas of future excavation or earthwork), and included recommendations for handling contaminated media during construction.

Seattle Parks and Recreation Department, Open Space Program, Level I Environmental Assessments, Seattle, Washington. Perform several Level I Environmental Assessments for the Seattle Department of Parks and Recreation Open Space Program, in Seattle, Washington. Evaluated environmental quality of properties for purchase by performing federal and state agency document reviews, reviews of site histories, and surficial site examinations.

Washington State Department of Transportation Initial Site Assessments, Various Locations, Washington. Performed Level One environmental property assessments on WSDOT properties for sale, lease or potential right of way acquisitions for roadway improvements.

Lynnwood Park and Ride, Lynnwood, Washington. Performed Phase 1 Environmental Site Assessments at several sites under consideration for a Transit Center. Planned Phase 2 site investigation, including soil probe sampling to reduce cost and impacts to current site owners.

AHERA Accredited Building Inspector
Portable Nuclear Gauge Safety and Hazmat Training
First Aid and Adult/Child CPR

EXPERIENCE

Ms. Kapise has over 13 years of experience as a geologist in the environmental industry. She has performed a variety of work associated with environmental due diligence, site characterization, and remediation. Her experience includes Phase I Environmental Site Assessments (ESAs); Phase II Subsurface Investigations (Phase IIs) with soil, soil vapor, and ground water sampling; well installation and ground water monitoring; Underground Storage Tank (UST) Site Assessments; Hazardous Materials Pre-Demolition Surveys; and Phase III remediation projects resulting in the issuance of a no further action (NFA) letter from the Washington State Department of Ecology (Ecology).

SELECTED PROJECTS

Ms. Kapise has performed hundreds of Phase I and Ph II ESAs, for both private and government sectors, on a variety of properties including, but not limited to, mixed use commercial, industrial and residential properties in both rural and metropolitan areas of the Pacific Northwest and Alaska. Ms. Kapise has also assisted and managed several remediation projects in the Puget Sound area.

SELECTED PROJECTS

PHASE I/PHASE II ENVIRONMENTAL SITE ASSESSMENTS

Alamo Manhattan Main Street, Bellevue, Washington. Performed a Phase I ESA on a commercial property that included an active drycleaners that had occupied the property for over 20 years. The property had previously been occupied by an automobile repair garage with retail gasoline services, a machine shop, a heating oil distributor, a blueprint facility, and a photo developing facility. Subsequent to the Phase I ESA, Phase II ESA subsurface investigations were conducted followed by a large-scale remediation of the property.

Broadway Used Car Lot, Everett, Washington. Performed a Phase I ESA on an active used car retail facility that performed vehicle maintenance and repair and previously included a gasoline service station. The Phase I ESA resulted in Nicole managing the Phase II assessment and subsequent remediation of the property, with the end result being the issuance of an NFA letter by Ecology.

Auto Body Shop, Monroe, Washington. Performed a Phase I ESA for an active body shop that had occupied the property since 1942. In addition to the ASTM standards, the Phase I ESA was performed in accordance to the Small Business Administration Standard Operating Procedures. The Phase I ESA findings resulted in Nicole managing the Phase II investigation of the property and subsequent remediation activities.

Funeral Home Property, Snohomish, Washington. Performed a Phase I ESA for a vacant funeral home that performed embalming services from the early 1900s to the early 2000s. Nicole managed activities performed following the Phase I ESA, which included a geophysical survey to determine the location of an out-of-use heating oil UST and a Phase II investigation of the property.

Former Washington Department of Natural Resources (DNR) Lacey Compound, Lacey, Washington. Performed a Phase I ESA on a retail center former occupied by the DNR Lacey Compound. The project included an extensive regulatory records review at Ecology to comply with ASTM E1527-13 standards.

Sultan Crossing, Sultan, Washington. Performed a Phase I ESA for a former logging services business that included logging vehicle and machinery repair services and sheet metal fabrication. Property had known contamination with inadequate remediation performed.

Light Industrial Property, Seattle, Washington. Performed a Phase I ESA for an active manufacturing facility that provided mechanical repair, machine welding, and metal plating, plasma spray, Teflon® coating, electrostatic and conventional coating services. The property had also been occupied by a former gasoline service station and automobile repair garage. Subsequent to the Phase I ESA, Nicole managed the Phase II subsurface investigation of the property.

APPENDIX C
USER PROVIDED INFORMATION

USER QUESTIONNAIRE for PHASE I ESA

AS REQUIRED by new ASTM Standard E1527-13 (published November, 2013)

To: Kari Chennault From: Nicole Kapise
At: City of Marysville At: HWA GeoSciences Inc.
Phone: 360-363-8277 Date: 12/13/2016

Subject Property Name: Welco Property
Address: 1218 1st Street, Marysville, WA 98270

The person who will use the Phase I ESA should provide the following information. Please fill in this form to the best of your ability, explaining any Yes answers on a separate sheet of paper. Without these answers, our report would have to note that the Phase I ESA is incomplete, and your Landowner Liability Protections could be at risk. We need these answers before we conduct the subject property visit.

1. **Environmental Cleanup Liens.** ASTM requires the User to check for environmental liens that may be filed or recorded against the subject property under federal, tribal, state or local law. Such liens might be listed in the "exceptions to coverage" in the property's title insurance commitment or policy. Failure to check for these liens could put your Landowner Liability Protections at risk.

Have you checked for these environmental cleanup liens? Yes No
Are you aware of any such liens against the subject property? Yes No

2. **Activity and Use Limitations (AULs).** These include engineering controls (e.g., slurry walls, caps) and land use restrictions or institutional controls (e.g., deed restrictions, covenants) that may be in place at the subject property or filed under federal, tribal, state or local law. The title commitment or policy might also list AULs.

Are you aware of any possible AULs involving the subject property? Yes No

3. **Specialized Knowledge.** This involves personal knowledge or experience related to the subject property or nearby properties. For example, if you are involved in the same line of business as the current or former occupants of the property or an adjoining property, you would probably have specialized knowledge of any chemicals, hazardous substances, and processes commonly used by that type of business.

Do you have any specialized knowledge that might indicate the past or present use of such substances or processes on the subject or nearby properties? Yes No

4. **Relationship of the purchase price to the fair market value (FMV) of the property if it were not contaminated.** A purchase price significantly below FMV may indicate an environmental problem. Please note that this question does not require an appraisal of the property. If the price is significantly below FMV, the User should consider whether it might be because contamination may be present at the subject property.

Is the purchase price significantly below fair market value? Yes No

5. **Commonly known or reasonably ascertainable information about the property.** This involves past or present spills, stains, releases, cleanups, etc. on or near the subject property.

Do you know of any obvious indicators of possible contamination on or near the property? Yes No

6. **The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation.** Please use a separate sheet if necessary.

a. Describe the past uses of the property: Lumber mill, See Phase I&II ESA by HWA, May 17, 2016

b. Describe any specific chemicals that may have been present at the property: Petroleum products, hydraulic fluids, coolants, lubricants, See Phase I&II ESA by HWA, May 17, 2016

c. Describe any other information that may help us identify possible contamination: Phase I ESA by URS, Feb 27, 2008, Phase I&II ESA by HWA, May 17, 2016

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal Delisted NPL site list

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 03/07/2016 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

<i>TULALIP LANDFILL</i>	<i>TULALIP INDIAN RESER</i>	<i>SSW 1/2 - 1 (0.618 mi.)</i>	<i>62</i>	<i>306</i>

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/18/2016 has revealed that there are 17 CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

ICR: These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

A review of the ICR list, as provided by EDR, and dated 12/01/2002 has revealed that there are 6 ICR sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal Brownfields sites

BROWNFIELDS: A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, and dated 07/18/2016 has revealed that there is 1 BROWNFIELDS site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 09/20/2016 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/18/2016 has revealed that there are 3 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

EXECUTIVE SUMMARY

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Site name: BAXTER AUTO REPAIR
Classification: Conditionally Exempt Small Quantity Generator

. Waste code: WSQG
. Waste name: A placeholder to allow BR submission to validate. In WA State, Conditionally Exempt Small Quantity Generators (Called SQG in WA) are not required to report waste streams, so no valid State or Fed codes are available for reporting to BR.

Date form received by agency: 12/31/2007

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 412.5

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 76662.2

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

AIR EMISSIONS CLASSIFICATION UNKNOWN

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Summary Details:

Conditions at Proposal July 29, 1991): The Tulalip Landfill covers approximately 146 acres on the Tulalip Indian Reservation near Marysville, Snohomish County, Washington. The site is bounded by Ebey Slough to the north, Steamboat Slough to the south, and Possession Sound to the west. All these surface water bodies flow into northern Puget Sound, a Federally designated National Estuary. This area is highly productive for salmon and shellfish and provides habitat for Federally-threatened species. In 1964, the Tulalip Tribe leased the land to Seattle Disposal Co. The company accepted municipal, industrial, and hospital waste from the greater Seattle area. The site (originally a wetland) was cleared and canals were cut into the site, allowing waste to be barged in from Seattle. Eventually the barge canals were filled with waste. An estimated 4 million cubic yards of waste were deposited at the site from 1964 to 1979, when the landfill was closed in accordance with a Federal consent decree. In February 1988, EPA conducted an extensive inspection of the site and the surrounding environment. Ground water, wetland water, and slough water contained heavy metals including lead, copper, chromium, and cadmium) in excess of EPA's Maximum Contaminant Levels established under the Safe Drinking Water Act and marine Ambient Water Quality Criteria

established under the Clean Water Act. An estimated 7,800 people obtain drinking water from private and municipal wells within 4 miles of the site, the nearest within 0.9 mile. EPA also found elevated levels of metals, volatiles including toluene and xylene), semivolatiles, and PCBs in leachate and pooled water on-site. Numerous strains of opportunistic pathogens were detected in leachate, pooled water, and slough samples. These opportunistic pathogens, due to infiltration of estuarine water rich in nutrients and dissolved oxygen, are resistant to several antibiotics and can therefore survive for years. In 1987, EPA issued a modified permit under the National Pollutant Discharge Elimination System (NPDES) requiring, among other items, the Tulalip Tribe to collect all leachate generated by the site and transport it off-site for treatment. The Tribe has not complied. An estimated 10 million to 90 million gallons of leachate are generated per year. During a December 1990 NPDES inspection, EPA found the site was receiving demolition debris not previously approved for disposal. Logs recently placed on-site were generating colored liquids. The Tribe has discontinued disposal of all demolition debris at EPA's request. Status April 1995): In August 1993, EPA and several potentially responsible parties, including waste generators, transporters, and the past operator of the landfill, signed an Administrative Order on Consent to conduct a RI/FS at the site. Preliminary results from this investigation indicate that landfill leachate leaving the site exceeds marine water quality criteria for heavy metals and other contaminants including chromium, copper, lead, mercury, nickel, iron, ammonia, heptachlor, and aldrin. PCBs were also found at elevated levels. Soil adjacent to the landfill indicates elevated levels of heavy metals, pesticides, PCBs, and semivolatile organic compounds (SVOCs). Sediment samples from wetlands adjacent to the landfill show elevated levels of heavy metals, polycyclic aromatic hydrocarbons (PAHs), pesticides, and SVOCs. EPA is currently reviewing a feasibility study which evaluates remedy alternatives that would contain the landfill contaminants. The description of the site release is based on information available at the time the site was scored. The description may change as additional information is gathered on the sources and extent of contamination. See 56 FR 5600, February 11, 1991 or subsequent FR notices.

Site Description: The Tulalip Landfill occupies approximately 147 acres and is located on a low-lying island (commonly referred to as North Ebey Island) in the Snohomish River delta. This island is within the floodplain of the Snohomish River. Located within the bounds of the Tulalip Indian Reservation, the landfill lies generally between Marysville and Everett, Washington. Prior to landfilling activities, the land on which the landfill is located consisted of relatively

TULALIP LANDFILL (Continued)

1000148974

undisturbed intertidal wetlands, and reached heights of about 3 to 6 feet above mean sea level (MSL). Today, the landfill reaches heights of about 12 to 20 feet above MSL. The landfill is bounded by a perimeter berm that is approximately 15 feet high. During landfilling operations, barge canals were cut into the island to allow water barges bearing refuse to transport waste into the landfill. Initially, waste was removed from the barges and placed directly on top of adjacent wetlands. During later operations, wetlands adjacent to the canals were dredged prior to placing the waste into dredged areas. In general, these barge canals were deeper than other parts of the landfill and are now filled with waste. The average depth of fill throughout most of the landfill is about 17 feet; in the old barge canals the fill depth reaches about 30 feet. Three to four million tons of mixed commercial and industrial waste were deposited in the landfill during its period of operation from 1964 to 1979. The waste is covered with silt, silty sand, clay, and medium sand, and demolition and construction debris at depths of up to 11 feet. The results of the Remedial Investigation (RI) indicate that there is a mound of contaminated groundwater (landfill leachate) within the landfill waste. This leachate mound is fed by precipitation, and its height varies between approximately 10-16 feet above MSL. Because the mound is considerably higher than the mean sea level and the ground water level surrounding the landfill, the weight of this leachate mound drives landfill contaminants out and away from the landfill. Some of the leachate (approximately 5-35%) is pushed out of the outer edge of the perimeter berm and flows onto wetlands and into tidal channels surrounding the landfill. Most of the leachate seeps occur outside of the landfill berm, but one seep that was sampled during the RI (SP-01) originates on the landfill surface. The remainder of the leachate (approximately 65-95%) is driven downward by the weight of the leachate mound into ground water beneath the landfill, where it migrates outward and is discharged to waterways surrounding the landfill. Groundwater beneath the site is brackish and therefore unusable as a potable water source. Site studies indicate that contaminated groundwater from the landfill migrates to the wetlands and sloughs surrounding the site and does not pose a threat to ground water drinking water sources located across the sloughs. The areas surrounding the landfill have significant aesthetic, environmental, economic, and recreational value. The landfill is located within the Puget Sound Estuary, one of 28 estuaries in the country that have been targeted for protection and restoration under the National Estuary Program. The State of Washington has classified the surface waters surrounding the site as 'Class A' waters of the State, which are characterized as generally 'excellent' waters, where water quality meets or exceeds the requirements for all, or substantially all, designated uses. The tidal mudflats and marsh habitats surrounding the landfill are natural resources that provide spawning and foraging areas for wildlife species. The Snohomish River delta is designated as a Washington Shoreline of Statewide Significance by the Washington State Department of Ecology, and designated as an Area of Major Biological Significance (AMBS) for American shad and English sole by the U.S. Fish and Wildlife Service. The landfill is surrounded on all sides by environmentally sensitive wetlands, including an area of approximately 160 acres of salt marsh and mudflats located immediately west of the landfill. Because of ongoing environmental problems associated with the landfill operations, the landfill was closed in 1979. In April 1995, with the support of the Governor of the State of Washington, the Environmental Protection Agency (EPA) published the final rule adding the site to the National Priorities List (NPL). In August 1993, EPA signed an Administrative Order on Consent with several Potentially Responsible Parties to conduct a RI and Feasibility Study. In March 1996, EPA published the Record of Decision (ROD) for the Tulalip Landfill interim remedial action. A ROD was issued in September 1998.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Count: 7 records.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704

Number of Days to Update: 17	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (206) 553-1200
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (206) 553-1200

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/28/2015	Source: Department of the Navy
Date Data Arrived at EDR: 05/29/2015	Telephone: 843-820-7326
Date Made Active in Reports: 06/11/2015	Last EDR Contact: 11/18/2016
Number of Days to Update: 13	Next Scheduled EDR Contact: 02/27/2017
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/09/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/01/2016	Telephone: 703-603-0695
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 11/29/2016
Number of Days to Update: 93	Next Scheduled EDR Contact: 03/13/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/09/2016	Source: Environmental Protection Agency

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
